

Pixel Peeper

pix3l-p33p3r@proton.me — pixel-peeper.me — [GitHub](https://github.com/pixel-peeper)

Professional Summary

DevSecOps practitioner with corporate experience in cloud-native security, Kubernetes, and HashiCorp Vault. Reduced secrets sprawl across a sovereign cloud provider's K3s infrastructure via Vault Agent sidecar injection and dynamic PostgreSQL credential rotation, while enforcing PCI-DSS and ISO 27017 compliance. Additional work in AI-driven pentesting, CI/CD security gates, and hardened infrastructure.

Experience

DevSecOps Intern — Cloud/Infra Team

6 Months

Atlas Cloud Services (ACS) • On-site

- Delivered VMaaS “Zero-Touch” automation across DNS, backup, monitoring, and tagging workflows for a sovereign cloud provider.
- Reduced secrets sprawl across K3s via HashiCorp Vault Agent sidecar injection and dynamic PostgreSQL credential rotation.
- Managed PKI/TLS lifecycle and automated certificate rotation; audited infrastructure with OpenSCAP against PCI-DSS and ISO 27017.
- Integrated Vault Radar to find and remediate hardcoded secrets across repositories.

DevSecOps Intern — AI Security Automation

6 Months

GSNA Solutions • Hybrid

- Built an LLM-powered pentesting orchestrator in Python (Nmap, Nikto, Metasploit), cutting manual pentesting effort by ~73%.
- Shipped an IP-in/report-out vuln pipeline synced with the NVD API (CVE scoring) and AI-structured reporting.
- Embedded SAST/DAST gates (SonarQube, Trivy, OWASP ZAP) into CI/CD and containerized the suite with Docker.

President

Nov 2022 – Present

Leet-Makers Robotics Club, UM6P-1337

- Led robotics security workshops for 150+ learners, blending embedded hardening with secure firmware delivery.

Technical Member & CTF Developer

May 2023 – Present

Elitesec Club, UM6P-1337

- Architected OSINT, hardware, and crypto CTF tracks; automated SecDevOps workflows via GitOps and policy-as-code.
- Led OPSEC and hardware-hacking masterclasses; codified security-as-code templates to scale collaboration.

Key Projects

- *ft_transcendence* — DevSecOps & Web App: Multiplayer Django app secured with ModSecurity WAF, ELK SIEM, HashiCorp Vault, Prometheus/Grafana, and automated CI vulnerability scanning.
- *Inception* — Secure LEMP Stack: Nginx SSL/TLS 1.3 reverse proxy, encrypted MariaDB, PHP-FPM, Redis cache, and isolated FTP in Docker.
- *Inception-of-Things* — Kubernetes IoT Lab: K3s/K3d lab with Ingress, Argo CD, and GitLab-driven GitOps automation.
- *cloud-1* — Ansible Orchestrator: Tag-aware Ansible roles and vault workflows for repeatable remote cloud deployments.
- *Homelab & Declarative Infra*: Proxmox/TrueNAS private cloud with NixOS services, OpenBSD packet-filter firewall, Pi-hole, and Syncthing.
- *Born2beRoot* — Linux Hardening: Certificate-based SSH, UFW, AppArmor, LVM encryption, and cron monitoring on hardened Debian.
- *Robotics & Embedded Security*: Hardened stacks from KiCad PCBs to C/C++ firmware with resilient I2C/SPI buses and secure boot paths.

Technical Skills

- | | |
|--|--|
| • Infrastructure & Cloud: AWS, GCP, Terraform, Ansible, Linux Admin, Nginx, Proxmox, Nix | • Security & Monitoring: SAST/DAST (SonarQube, Trivy, OWASP ZAP), Pentesting, CVE Analysis, Prometheus, Grafana, ELK |
| • DevSecOps & Containers: Docker, Kubernetes (K3s/K3d), Helm, ArgoCD, GitOps, Jenkins, GitLab CI, Vault, OpenSCAP, PKI/TLS | • Embedded & Industrial: PLC, SCADA/HMI, KiCad, SBC, CAN Bus, UART/I2C/SPI, BLE/Zigbee/LoRa |
| • Programming & Data: C/C++, Zig, Python, Bash, Git, SQL (PostgreSQL), Supabase | |

Education

Network & Information Systems Architect

Expected 2027

1337 School (42 Network), UM6P Ben Guerir

RNCP Level 7 (Master's eq.)

Focus: Linux administration, networking, automation, cloud computing, infrastructure security.

Certifications & Training

- Google Cloud Professional Cloud DevOps Engineer: CI/CD, SRE, and monitoring on GCP.
- Google Cybersecurity Certificate: Foundational security operations — Google Career Certificates.
- Offensive Security Practice: 20+ HTB/TryHackMe challenges — hardware, crypto, reverse engineering, OSINT.
- Cloud Security: Participant, Global 42 AWS Cloud Quest Tournament.

Additional Information

Languages: English (Fluent), French (Professional), Arabic (Native).

Interests: Zero-knowledge and trust proofs, post-quantum crypto, embedded supply-chain security, OSINT automation, hardware side-channel analysis, open-source security tooling.
